To whom it may concern

Alyth Hill Users Group – Bike Park

I am writing in support of the Alyth Hill Users Group's Bike Park project at Alyth Community Woodland, Perthshire.

The Alyth Hill Users Group is an exceptionally well-organised and focussed organisation which has taken a lead in developing the relationship between the community and the Forestry Commission for management of the local woodlands. They have been innovative, pro-active and inclusive in their management of the area and have carried out their own local fundraising successfully to contribute to the project.

The Bike Track has the potential to make a significant positive impact on Alyth and the surrounding area by providing a facility for local families and also acting as an outdoor pursuits tourist attraction. The provision of this facility will also encourage cross-generational physical activity and healthy lifestyles in the community.

We are proud to be supporting this project through the Drumderg community fund and hope that our grant award of £13,394 is a testament to the importance and positive impact of this project to the whole community of Alyth.

Yours sincerely
